

# HOD ICA Download Instructions

## HOD v9 for Macintosh OS 8, 9, 10.0, 10.1 or 10.2 via the Citrix ICA Client

---

### Downloading the Citrix ICA client and the connection profile

*Note: In the steps that follow you may need to select "save-as" for the links if your browser displays the file rather than downloading it.*

1. You may first need to download the Citrix ICA client.

Select this link to download the Citrix ICA client for OS 8, 9 or 10.0, 10.1 or 10.2

[MACICA\\_SEA.hqx](#)

You can use "Stuffit Expander" (at <http://www.allume.com/mac/index.html>) to open this file.

Once the file has downloaded, you should double-click the file. This will create a folder called "Citrix ICA Client".

Open the Citrix ICA Client folder and double-click on the installer application. Follow the default selections for the install.

2. Then select your desired screen resolution from the list below and

download a "Citrix ICA Connection" file (this is preferred; click on "Try" when prompted with the message "The file does not appear to be compressed or encoded ... would you like to try opening the file using Citrix ICA Connection Center?"):

[640x480](#) -- [800x600](#) -- [1024x768](#) -- [1280x1024](#)

**OR,**

download a text file (save the file with a .ica extension; then associate it manually by dragging the file to the "Citrix ICA Client" folder and dropping it on the "Citrix ICA Client" application within that folder):

[640x480](#) -- [800x600](#) -- [1024x768](#) -- [1280x1024](#)

## **Accessing the HOD service**

1. After you download a “Citrix ICA Connection” file, double-click on it to launch the Citrix Client and connect to the HOD Server.
2. You should be connected to the HOD service and see the Default HOD Session Selection Screen with preconfigured session for 3270 Display Template, UCSB COMPLETE, and UCOP PPS.
3. Simply double-click the desired session and you should be connected to the remote system.

## **Usage Notes:**

**You cannot save session changes to the profiles accessing HOD via IS&C's Thin Client Service. You can make changes for the duration of your sessions.**

**Also note that you cannot do screen prints from within HOD via IS&C's Thin Client Service. You can take a screen shot of a HOD session by pressing the **command, shift and the number 3 key.****
